

1.

Wash your hands thoroughly before use. Clean and dry the affected area(s) where the medication will be applied.

2.

Place the bottle upright on a stable surface. Twist the dropper cap counterclockwise to remove it from the bottle.

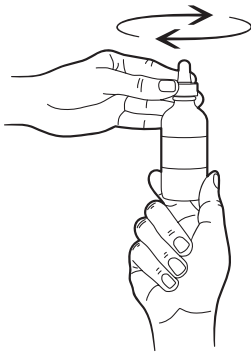

3.

Submerge the tip of the dropper in the medication. Squeeze the bulb then release it slowly to draw up the prescribed amount of medication into the dropper.

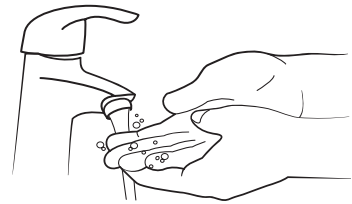

4.

Position the dropper tip on at the application site and squeeze the bulb to apply the medication. Avoid touching the dropper tip directly to the skin or hair to help keep the device and medication clean. Gently rub the medication into the application site(s) as directed.

5.

Insert the dropper back to the bottle and twist the cap clockwise to reseal the vial.

6.

Wash your hands thoroughly after applying the medication. Avoid contact with your eyes, mouth, or inside your nose. If accidental contact occurs, rinse the area with large amounts of cool tap water.
